4. Future Developments

1. Background to the New Directory

How the New Directory came about

- ❑ The RSS reception desk receives 1 or 2 calls a week asking if they can recommend a consultant.
- ❑ The RSS charter forbids them from favouring a particular member over another.
- ❑ Therefore they have to direct them to the Consultants Directory on the RSS website.
- ❑ The older versions of the directory have varied from unhelpful to shocking.
- ❑ Despite this, at times I have been able to attribute up to 10% of my income from enquiries that came via the directory.

Timeline of the New Directory

- ❑ End-2013 – PAC (Professional Affairs Committee) directs me to set up a working party to design a New Directory.
- ❑ Jan-July 2014 – The working party drafts the specification.
 - Consisted of me, Tony O’Hagan, Carolyn Craggs, Roland Caulcutt & Andrew Cockayne.
- ❑ September 2014 – Specification delivered to the Developers.
- ❑ Q2 2015 – Work starts on implementing the specification.
- ❑ July 2015 – test version created and tested.
- ❑ Sept 2015 – New directory goes live.

Mr. Nigel Marriott

I am an independent consulting statistician & data scientist based in Bath, England with a global client base. I have over 20 years' experience of using statistical thinking and methods to solve business challenges around the world. To date, I have worked with over 100 clients from many industries in the public and private sector.

The breadth of my experience is highly unusual in any profession but particularly for a statistician, who tend to specialise in particular fields. I have worked with teams in research, purchasing, finance, trading desks, sales, marketing, product design, IT, recruitment, engineering, manufacturing, quality & scientific fields. My background and experience means that I am especially strong at

3. How to Help Searchers Find You

Where to Find the Public Directory

www.rss.org.uk/consultants

A link from the Home Page will be added once enough Cstats have put up their profiles.

The screenshot shows the Royal Statistical Society website header with the logo and tagline "DATA | EVIDENCE | DECISIONS". A navigation bar contains links for Membership, Professional Development, Events, Get Involved, Influencing Change, Publications, About, and MyRSS. A dropdown menu is open under "Professional Development", listing options like Professional awards, Continuing Professional Development, Examinations, RSS training courses, and Accredited university courses. A second dropdown menu is open under "Chartered Statistician", listing "Chartered Statistician", "Chartered Scientist", and "Graduate Statistician". A third dropdown menu is open under "Chartered Statistician", listing "Why become chartered?", "Professional register", "Revalidation of the award", "Professional Statisticians' Forum", "Professional indemnity insurance", and "Consultants Directory" (which is highlighted in red). Below the navigation, a snippet of text reads: "We provide a Directory of Statistical Consultants listing our professionally qualified members (CStat). The Directory contains profiles created by the consultants, including information on their specialisms and background as well as their contact details. It operates on an opt-in basis – each consultant has agreed to..."

Consultants Directory

We provide a Directory of Statistical Consultants listing our professionally qualified members who offer a statistical consultancy service. Professionally qualified members hold the status of [Chartered Statistician](#) (CStat).

The Directory contains profiles created by the consultants, including information on their specialisms and background as well as their contact details. It operates on an opt-in basis – each consultant has agreed to their profile being available on our public website.

We assume that users of the Directory have read and understood the [conditions of use](#) (PDF). We also provide [search guidance notes](#) (PDF) to help you find the right consultant for your organisation.

If you have any queries, [please contact us](#).

Guidance is based around the RSS strapline of “Data-Evidence-Decisions”.

Searchers encouraged to identify nature of their problem and use associated keywords. Examples are given here.

Rather than industry based searches, we are encouraging searchers to use departmental related keywords as shown in the examples.

Use Customer Language for Your Specialisms!

profile **specialism** background contact details

Specialisms

I specialise in the following 5 areas. For more details and case studies please visit my website or my LinkedIn profile as shown on the Contact Details tab.

SURVEY DESIGN

Sample size calculation, questionnaire design, imputation models, acceptance sampling, decision rules, sample design, market research.

CUSTOMER ANALYTICS

Customer segmentation, key driver modelling, predictive analytics, client data analysis, churn models.

FORECASTING & RISK MODELS

Forecasts, business planning, risk analysis, decision science, trend analysis, projections

STATISTICAL TRAINING COURSES

Basic Stats Courses, Statistical Thinking, Identifying Trends and Making Forecasts.

EXPERT WITNESS & ADVICE SERVICES

Expert advice, statistical expert, stats advice

Key Points to Note

1. Use the language of your prospective clients in your profile, not the language of statisticians.
2. Focus on what you are good at rather than trying to capture everything that you could potentially do.
3. Remember that your profile can contain links to your website & LinkedIn profile so don't make it too long.
4. As CStats, you have undertaken to abide by the RSS Fellows Code of Conduct. This means -
 - a. Do not mislead the prospective client as to your experience, capabilities and skills.
 - b. In particular, make it explicit what your consultant status is i.e. independent, attached to university, moonlighting for pocket money, etc.

4. Future Developments

This Time the Directory Will Evolve!

- ❑ Search Guidance PDF download will be kept up to date.
 - Feel free to email your suggestions!

- ❑ Search terms used by searchers will be tracked.
 - We will keep you up to date on what terms are being used.
 - How we do this is not yet decided so do give us your ideas.

- ❑ In 6 to 12 months time we will carry out a review of how well the directory has worked and make modifications if needed.
 - We expect this to involve a survey of consultants and clients (if possible).

Some Ideas to Consider

- ❑ Should we provide guidance to searchers on how to engage a consultant?
 - This could list the things we expect from a client and what the client can expect from a consultant.

- ❑ Should we provide guidance on consultant fees?
 - The ASA have carried out surveys of consultant fees and provide a breakdown by industry, level of education, etc.

- ❑ Would it be worthwhile adding a facility to allow searchers to mass email all consultants with a description of their problem?
 - This feature does not yet exist but we did ask the developers to build the directory in such a way that this could be added.
