

MODULAR HIGHER CERTIFICATE
MODULE 8 – SURVEY SAMPLING AND ESTIMATION

Cochran W G	1977 3rd Ed	Sampling Techniques	Wiley
Lohr S L	1999	Sampling: Design and Analysis	Duxbury

Both of the books listed above provide an excellent coverage of the material in the syllabus, and are highly recommended. Either would suffice for this module.

Chambers R L & Skinner C J (Editors)	2003	Analysis of Survey Data	Wiley
Särndal C-E, Swensson B & Wretman J	2003 2nd print of 1st Ed	Model Assisted Survey Sampling	Springer-Verlag

These two books go much further than the syllabus. They are listed for completeness as they might, for example, be of interest to candidates who find that more advanced areas touched upon lightly in the syllabus (for example ratio and regression estimation) have benefits in their workplace.
