

Directory of Statistical Consultants

Conditions for Use

*These are the Conditions for Use of the RSS Directory of Statistical Consultants.
It is assumed that users of the Directory have read and understood these Conditions.
General information about the Directory is available on the Society's website.*

The Royal Statistical Society provides a Directory of Statistical Consultants listing those of its professionally qualified members who are prepared to act as consultants in statistics. Professionally qualified members hold the status of Chartered Statistician (CStat) or, equivalently, may be Members or Fellows of the Institute of Statisticians (MIS or FIS).

The Directory of Statistical Consultants contains profiles created by each consultant which include information on their specialisms and background as well as contact details.

The information in the Directory of Statistical Consultants is based solely on what has been provided by the members. It is provided strictly on an "as is" basis and the information has not been verified by the Society. Potential clients wishing to engage a consultant should approach individuals directly and negotiate an appropriate contract. The Society itself has no role in these negotiations.

Members of the Society are awarded professional status only after having gone through a rigorous application procedure designed to ensure that they satisfy specified criteria. Professionally qualified members agree to abide by a Code of Conduct which requires that they only undertake work within their own areas of competence and expertise. Nevertheless, the Society cannot take responsibility for or give any warranty in respect of the quality, appropriateness or general level of service offered by consultants.
